

Deliver excellence through true learning, KM and IT services

Dexlau Consulting helps implement knowledge management systems and develop applications using emerging web and mobile technologies. Our experience-driven true learning programs help gain insight into knowledge management and emerging IT.

Due to the continuous changes in the IT field and its complexities, it is necessary to leverage the experts to learn and embrace the right IT systems. Following are the key services we deliver:

Knowledge Management (KM)

We work with KM companies to implement and manage the right knowledge strategies and systems. It helps in:

1. Setting up center of excellence for knowledge management to maximize the self-sufficiency on KM
2. Deploying and empowering the organization with learning and knowledge management systems
3. Managing personal competency and leveraging collective knowledge assets
4. Establishing knowledge community and facilitating the knowledge sharing culture
5. Understanding and identifying the right knowledge platform
6. Managing the KM initiatives and successfully driving change

This high value consulting and the learning management solution powered by knowledge management strategy are vital for transforming the campus and corporates. It helps manage the competitions and meet the high expectations in this knowledge era.

Information Technology (IT)

Dexlau's IT Division focus on:

1. Developing software applications using emerging web and mobile technologies.
2. Deploying Project & Support management systems and strategies to drive scalability and maximize productivity.

Dexlau's Technology Expertise:

- Programming such as Java, JDBC & C
